Senior Software Engineer with 7 years of experience designing, building, and scaling production web applications and e-commerce platforms. Possesses deep expertise in React, Next.js, TypeScript, and Node.js, with a proven track record in frontend architecture, backend API development, third-party integrations, AWS infrastructure, performance optimization, and developer tooling. Adept at owning features end-to-end, diagnosing and resolving complex production issues, modernizing legacy codebases, and driving collaboration across product, design, and engineering teams.

Professional Experience

Senior Software Engineer, Cimpres 05/2021 – Present | Remote, India

- Own end-to-end development of critical **Gifta.com** product experiences, including product configuration, personalization, artwork, and preview workflows.
- Launched a **gift-wrapping experience that increased revenue by approximately 5%**, collaborating across product, design, and engineering teams.
- Build and maintain large-scale customer-facing e-commerce capabilities using **React, Next.js, TypeScript, Node.js, and REST APIs**.
- Integrated **interactive 3D product visualization** into personalization experiences by connecting product configuration, design data, and rendering services.
- Improved **Core Web Vitals and frontend performance** by identifying rendering bottlenecks, optimizing application behavior, and resolving issues affecting customer experience and SEO.
- Architected integrations between internal services and external commerce platforms, including **Shopify and Etsy**.
- Engineered backend services and APIs using **Node.js, NestJS, MongoDB, Redis, and BullMQ** to support asynchronous and integration-heavy workloads.
- Diagnosed and resolved complex production issues spanning **frontend applications, backend APIs, AWS infrastructure, authentication, and third-party services**.
- Built and maintained **Playwright end-to-end test suites** for critical customer journeys while contributing to TypeScript adoption and modernization of legacy codebases.

Technical Initiatives

- Built an **AI-assisted developer onboarding agent** that streamlined environment setup, dependency installation, access configuration, and development workflows.
- Created a **developer knowledge and context platform** using GitHub Copilot, MCP, Confluence, Jira, and Markdown-based knowledge sources to make engineering information reusable and accessible during development.

Programmer Analyst, Cognizant Technology Solutions 07/2019 – 04/2021 | Bangalore, India

- Took end-to-end ownership of an AI-based recruiting/interviewing platform.
- Researched, designed and developed a mobile app POC to identify infected and contacted covid people using low-frequency Bluetooth devices.
- Developed and maintained a website to track all the data from IoT devices.
- Improved website legacy support from IE10 to IE6

Awards

Significant Impact, Cimpres 01/04/2023

Extraordinary Impact, Cimpres 01/01/2022

MISCELLANEOUS

Luzo - API Workflow Automation

10/2021 – Present

- Built an API workflow automation tool for creating and orchestrating multi step API workflows with reusable configurations.
- Ranked **#31 out of 500+ products on Product Hunt**, demonstrating strong early adoption and community interest.

DevWiz - Developer Toolkit

Designed reusable, modular utilities with a focus on fast client-side interactions, maintainability, and a consistent developer experience.

Skills

Next.js • React.js • Typescript • Express • Node.js • Tailwind • Framer Motion • Javascript • Git • Playwright • Redis

Education

Bachelor of Engineering (CSE)

08/2015 – 05/2019 | Dindigul, India

PSNA College of Engineering and Technology
